

The Kentucky Health Information Exchange (“KHIE”) makes patient health care information available electronically to the Kentucky Department for Medicaid Services, Kentucky State Laboratory, and certain health care providers who are covered by HIPAA and participate in the KHIE (KHIE Participants). KHIE Participants agree to KHIE’s terms and conditions, including its security and privacy requirements, and agree to access the information for purposes of treatment, payment and health care operations according to applicable federal and state laws. A detailed description of KHIE can be found at <http://khie.ky.gov>. Making patient health care information available to participating health care providers through KHIE promotes efficient and quality health care for patients. We are a KHIE Participant. As such, we are able to obtain more complete information about our patients’ medical histories when their health care information is available through KHIE. We make our patients’ health care information available to other KHIE Participants who have a need to know it for purposes of treatment, payment and health care operations. You may choose not to allow your information to be available through the KHIE. Participation in the KHIE is not a condition of receiving care. However, if you decide not to make your information available to the KHIE, it may limit the information available to your health care providers. Your information is not stored with the KHIE. Rather, information is only pulled through the KHIE when participating providers request your information. Then, a copy of your information is stored with the receiving provider, much like a fax between health care providers. Please let us know if you have questions about KHIE or desire not to make your information available through the KHIE.
